Seuic

One Black Diamond
A True Rugged Flagship

AI-Powered Computing
Millisecond-level recognition for OCR, barcodes, and DPM codes

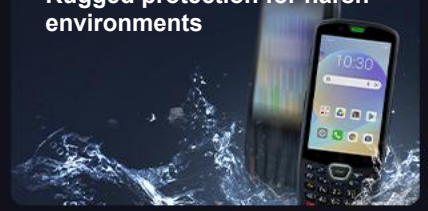

Built for 5+ Years of Reliable Use

5 Million+ Keypress Durability

IP67 & 1.8m Drop Resistance
Rugged protection for harsh environments

Real-Time 3D Alerts & Feedback

Comprehensive Battery Health Monitoring

Packet Loss Rate ≤1%

Black Diamond Precision:
Elite Scanning Performance

AI-Powered Next-Gen Scanning, 2–3× performance boost for superior decoding capability

· Easily captures high-density, low-contrast, damaged, stained, reflective, and metal DPM barcodes

AI-Enhanced OCR Recognition

2x faster text recognition

· Instant capture and inpuit with greater accuracy and fewer errors

★This document is a confidential document. Without the consent of Seuic, it is forbidden to publish, copy and forward.

Black Diamond Durability:
Built for 5+ Years

- Diamond-Cut Keypad: Precision-crafted crystal keys with superior wear and pressure resistance, and rated for 5 million+ presses
- Industrial-Grade Reliability: Powered by Qualcomm platform and Android 14 for an extended product lifecycle. IP67 sealing and 1.8m drop resistance ensure reliable operation for 5+ years in demanding environments

★This document is a confidential document. Without the consent of Seuic, it is forbidden to publish, copy and forward.

Black Diamond Precision:
Elite Scanning Performance

- Intelligent Battery Protection, full-cycle battery monitoring and smart charging for enhanced safety and longer lifespan
- Seamless Battery Replacement, quick battery replacement without downtime or data loss
- Secure Battery Lock Structure, internal auto-lock design keeps the battery firmly secured during extreme drops and rolling impacts

5360mAh
High-Capacity Battery

AI+powered power-saving technology
Reduces power consumption by over 25%

Black Diamond Sensory:
Fast, Multi-Dimensional Response

· Front Halo Scan Indicator features bright and intuitive lighting feedback for faster, more efficient scanning.
· 105dB High-Power Speaker engineered with a large acoustic chamber delivers strong sound penetration for clear alerts even in noisy environments
· Upgraded Linear Vibration Motor delivers faster and sharper haptic feedback with ultra-low scan response latency, offering a lifespan up to 10× longer than conventional motors, ideal for intensive workloads

Green

Scan succeeded

Red

Scan failed

Blue Breathing Model

Unprocessed information

Red Breathing Model

Low battery (≤15%)

Black Diamond Connectivity:
Stable Roaming, Reliable Performance

· Wi-Fi Ready with Seuic Wi-Fi Well Technology
· Network capacity utilization increased by 2-3x for faster uploads and downloads with multiple devices.
· Ultra-low latency of 3-4ms in complex environments
· Packet loss rate ≤1% with enhanced anti-interference capability

★This document is a confidential document. Without the consent of Seuic, it is forbidden to publish, copy and forward.

AUTOID 10 Applications

Store management

Store operation
Anti-fake and Anti-channel conflict
Stock-Sale-Inventory management

Production management

Raw material management
Production line management
Quality inspection

Warehouse management

Sorting/Packing
Receipt / Shipment
Inventory management
